

Java Developer

About Dion:

Dion Global Solutions is a trusted global financial technology company with expertise in building solutions for wealth management. The Java Developer role will involve working closely with a team of software developer's to develop and enhance Dion's Wealth Intelligence (WIN) platform.

Dion's Wealth Intelligence (WIN) platform introduces new modules and incorporates many of our award-winning wealth management solutions. The platform, hosted on the Amazon cloud (AWS), and with its open API ecosystem and data agnostic approach, WIN provides seamless user experience, enriched analytics capabilities and data confidentiality and protection. Utilising the latest technologies including; HTML5, Angular and Bootstrap to deliver mobile first & responsive application design that provides superior performance and scalability. The platform's container technologies like Kubernetes, and docker; allows for a simpler and quicker deployment model whilst increasing infrastructure efficiency.

Our wealth management software has been supporting the growth of several wealth management firms in the UK for over thirty years. Over the years, the solution has evolved to automate the complete front to back office processes within a wealth management firm.
