dionglobal.com

## About Dion

Dion Global Solutions is a leading technology solution provider, partnering with global banking and financial institutions to optimise the processing of business operations and transform their customer experience. With over three decades of experience in building creative software solutions for wealth management; post trade processing; FATCA, CRS and other tax compliances; mutual fund distribution and governance, risk and compliance, we understand the needs of our customers and build customised solutions to address their specific requirements.

Dion Global's integrated front to back office software solutions are designed to meet the specific needs of investment banking, retail and commercial banking, institutional trading and private client wealth management and stockbroking. With presence in 12 cities across 8 countries, we have grown into a leading global financial technology solutions provider. We have over 250 clients in 10 countries supported by a worldwide staff of 300, including more than 200 in product development.

## C++ Developer

## The Role
